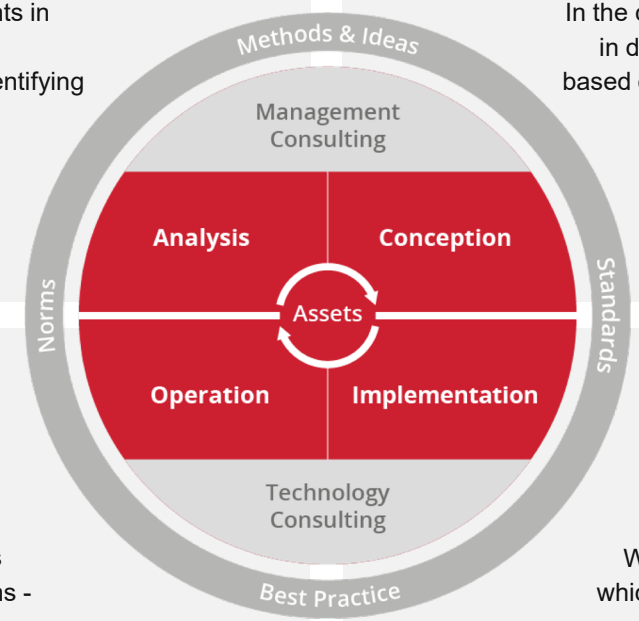
What is our approach

Orianda Solutions AG

SAP® Recognized Expertise
in Asset Management

Analysis
In the course of the analysis, we support clients in systematically recording the existing Asset Management, objectively evaluating it and identifying the potential for optimization on this basis.

Conception
In the course of the conception we support our clients in designing the future Asset Management System based on the results of the analysis and in building up a powerful asset management architecture.



Operation
Once the implementation of the new Asset Management architecture with the go-live has been successfully completed, operation begins - as an ongoing task in which we also support our customers.

Implementation
With the implementation we realize the concept, which was created on the basis of the analysis, for an SAP-based Asset Management technologically.
